Most 2-stroke engines require that you mix the fuel with a special oil. In most small 2-stroke engines (like those for string-trimmers and chainsaws) the oil is mixed with the gasoline. In larger engines, the fuel is injected into the engine. This oil is required to lubricate the engine. In 4-stroke engines, the lubricating oil is in the crankcase.

Basic Small Engine Repair - Introduction to 2-Cycle Engine ...

Many 2-cycle engines have problems and are sent to the junk yard before their time. Typical problems include hard starting, rough running, a need to adjust the carburetor during use to keep the engine from stalling, a need to rev the engine to keep it from dying, and not starting at all.
