has not only established itself as the embodiment of what Lotus stands for, it retains a unique place in the international sports car market. No other manufacturer came up with a car to seriously rival the Elise, nor the Exige, in terms of handling dexterity on both road and racetrack, and it aptly characterizes the definition of a sports car. Written in Johnny Tipler's inimitable style this book includes a detailed evolution of the Elise and Exige, including full specification tables; interviews with key individuals involved in their design and development, including Richard Rackham, Gavan Kershaw, Neil Thomas, Russell Carr, Barney Hatt and Andy Pleavin; Elisa Artioli on her namesake, its past and future; motor sport adaptations and successes and finally, driving experiences on road and track. The production of the Elise and Exige was sustained through four corporate upheavals. Now in Geely ownership, the

future for Lotus looks bright.

Tribological Processes in Valvetrain Systems with Lightweight Valves: New Research and Modelling provides readers with the latest methodologies to reduce friction and wear in valvetrain systems—a severe problem for designers and manufacturers. The solution is achieved by identifying the tribological processes and phenomena in the friction nodes of lightweight valves made of titanium alloys and ceramics, both cam and camless driven. The book provides a set of structured information on the current tribological problems in modern internal combustion engines—from an introduction to the valvetrain operation to the processes that
