Looking for simple, clean, NO PREP guided Algebra 1 notes? Here they are! These notes are for the Algebra Chapter of: Exponents and Exponential Functions These notes include: 1. Multiplication Properties of Exponents 2. Division Properties of Exponents 3. Rational Exponents 4. Exponential

Rational Exponents Worksheet Algebra 1 | Teachers Pay Teachers

I suggest you read Fractional Exponents first, or this may not make sense. Anyway, the important idea is that: $x^{1/n} =$ The n-th Root of x. And so a fractional exponent like $4^{3/2}$ is really saying to do a cube (3) and a square root (1/2), in any order. Just remember from fractions that $m/n = m \times (1/n)$:

Laws of Exponents - MATH

Algebra 1: Number and Quantity » The Real Number System Caution: If a number does not have an exponent visible, it is understood to have an exponent of ONE! Let's practice writing numbers in exponential form. Examples: Write 81 with a base of 3.

Virtual Nerd's patent-pending tutorial system provides in-context information, hints, and links to supporting tutorials, synchronized with videos, each 3 to 7 minutes long. In this non-linear system, users are free to take whatever path through the material best serves their needs. These unique features make Virtual Nerd a viable alternative to private tutoring.

Exponents and Exponential Functions | Algebra 1 | Virtual Nerd

Understanding Exponents. As we begin our study of monomials, you will need to learn and understand the use of exponents. So, let's begin by defining the term exponent. An exponent is a number (small and raised) that represents the "shortcut method" to showing how many times a number is multiplied by itself.
