Is there room for religion in politics? In this insightfully written book, Paul Marshall argues that Christians can and should approach politics in a way informed by faith. Drawing on traditions of both Catholic and Protestant political thought, Marshall analyzes the ways in which religion influences our understanding of power, justice, and democracy. By exploring the biblical background of modern issues, Marshall provides an indispensable guide for Christians searching for a way to interject their religious convictions into their political actions. In an age when the relationship between politics and religion is becoming ever more important--and ever more blurred--both in America and beyond, God and the Constitution is essential reading for anyone interested in the intersection of faith and government.

The provocative and authoritative history of the origins of Christian America in the New Deal era We're often told that the United States is, was, and always has been a Christian nation. But in One Nation Under God, historian Kevin M. Kruse reveals that the belief that America is fundamentally and formally Christian originated in the 1930s. To fight the "slavery" of FDR's New Deal, businessmen enlisted religious activists in a campaign for "freedom under God" that culminated in the election of their ally Dwight Eisenhower in 1952. The new president revolutionized the role of religion in American politics. He inaugurated new traditions like the National Prayer Breakfast, as Congress added the phrase "under God" to the Pledge of Allegiance and made "In God We Trust" the country's first official motto. Church membership soon soared to an all-time high of 69 percent. Americans across the religious and political spectrum agreed that their country was "one nation under God." Provocative and authoritative, One Nation Under God reveals how an unholy alliance of money, religion, and politics created a false origin story that continues to define and divide American politics to this day.
