A thought is an electrochemical event taking place in your nerve cells  
producing a cascade of physiological changes. The article "How Your  
Thoughts Program Your Cells" explains it this way: There are thousands  
upon thousands of receptors on each cell in our body. Each receptor is  
specific to one peptide, or protein.

While an important partner in the triad of the human mind, the conscious mind serves as a scanner for us. It will perceive an event, trigger a need to react, and then depending on the importance of the event, store it either in the unconscious or the subconscious area of the human mind where it remains available to us. From the time of Francis II the form of the edifice lets the geometrical outline show through more and more, like the bony framework through the skin of an emaciated body. The generous curves of art give place to the cold and inexorable lines of geometry. An edifice is no longer an edifice, it is a polyhedron.

From where does this "I" arise? Seek for it within; it then vanishes. This is the pursuit of wisdom. When the mind unceasingly investigates its own nature, it transpires that there is no such thing as mind. This is the direct path for all. The mind is merely thoughts. Of all thoughts the thought "I" is the root. - Ramana Maharshi

The domain of spirituality, separated from its theological overburden, believes in the existence of a spiritual self, presumed to be distinctly separate from the psychological self. The spiritual eternal self, also known as the soul or spirit (sometimes supported by an overarching Spirit), is asserted to be operating behind the ephemeral self. This book takes a contrarian stance; it argues that the premise of the soul concept is obtained through the magic of language, maintained through the marvel of the brain's biochemistry, and sustained through the mirage of the psychological juggernauts of the brain. The magic, the marvel and the mirage, together, bring about subtle shifts as the linguistic brain suppresses many psychological details, habitually applies mental templates such as inversions and dichotomies, and enhances its language by coining religious and spiritual metaphors. The consequence of these changes is that the usual flickering self begins to be impressed by itself, believing it

is buttressed by something transcendental and eternal within: the soul or the spirit. The self, although indoctrinated during its formative years, also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas, the overburden, signifies as the legitimate proof for the eternal soul.

Charts the development of Ferenczi's 'Active Technique' in papers such as "The Technique of Psychoanalysis" and "Further Development of an Active Therapy". "George Makari has written nothing less than a history of the modern mind. But REVOLUTION IN MIND is also a tragedy. It is the moving story of what we lost when the old world went up in flames." - Paul Auster. An award-winning scholar and writer delivers a definitive, radically new history of Freud, his disciples, and the tumultuous history of psychoanalysis. In this brilliant, engaging and accessible work, - the first comprehensive history of the subject ever written - renowned psychoanalyst George Makari goes past the heated debates over Freud to tell the fuller story of the origins and development of psychoanalysis in Europe. Beginning with great changes in late 19th century science, medicine and philosophy, Makari traces the field's diverse intellectual influences and the fascinating characters who shaped its formation until 1945. Groundbreaking, insightful and compulsively readable, REVOLUTION IN MIND is a fascinating history of one of the most important movements of modern times.
