This paper compares the site aspects of a Voltage-Sourced Converter (VSC-HVDC) project and a Line-Commutated Converter (LCC-HVDC) project of similar rating. Initially a brief description of the two technologies is presented. Then the project information for the EWIC (Shotton) and Grita (Galatina) sites is provided.

HVD Cable Technology The design of HVDC cables is complex and difficult, and a great deal of experience and research work is required for the successful development of a reliable cable. The thermal and pressure dynamics, for example, are of great importance. Under load a thermal expansion pressure is built up in the insula- tion.
