Real Analysis. Bartle and Sherbert exercise 2.3 solution ...

2 Bartle and Sherbert Conversely, if  $x$  is in  $(A \setminus B) \cap C$ , then  $x \in A \setminus B$  or  $x \in C$ . Thus  $x \in A$  and either  $x \notin B$  or  $x \in C$ , which implies that  $x \in A \setminus B \cup C$ , so that  $x \in (A \setminus B) \cap C$ . Thus  $(A \setminus B) \cap C \subseteq (A \setminus B) \cup C$ . Since the sets  $(A \setminus B) \cap C$  and  $(A \setminus B) \cup C$  contain the same elements, they are equal. 5.

Bartle And Sherbert Exercise Solutions

This edition is dedicated to the memory of Robert G. Bartle, a wonderful friend and colleague of forty years. It has been an immense honor and pleasure to be Bob's coauthor on the previous editions of this book. I greatly miss his knowledge, his insights, and especially his humor. November 20, 2010 Urbana, Illinois Donald R. Sherbert
