This full-color handbook is a quick-reference guide to all aspects of documentation for every nursing care situation. It covers current documentation systems and formats, including computerized documentation, and features scores of sample filled-in forms and in-text narrative notes illustrating everything from everyday occurrences to emergency situations. Coverage includes timesaving strategies for admission-to-discharge documentation in acute, outpatient, rehabilitation, long-term, and home care environments and special documentation practices for selected clinical specialties: critical care, emergency, perioperative, maternal-neonatal, and psychiatric. The book includes advice on legal safeguards, dangerous abbreviations, and compliance with HIPAA guidelines and JCAHO requirements.

This innovative text uses a simulation approach to give readers interested in healthcare documentation and medical transcription careers a working knowledge of medical reports common in both acute and chronic care settings. Readers have access to transcription of 107 patient medical reports, including 56 new reports exclusive to the Eighth Edition. This edition also features 20 new speech recognition technology/medical editing (SRT) reports, as well as information on electronic health records (EHRs), quality assurance (QA), and scribes to keep readers up-to-date on the latest advances in the field. Organized by body system, the text includes full-color anatomy and physiology illustrations to make medical terminology easier to master. In addition, the authors have included a review of proper formatting, grammar, and style in accordance with the AHD's BOOK OF STYLE, and a master glossary list compiles key terms in one section for convenient study and quick reference. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Thoroughly updated for its Second Edition, this comprehensive reference provides clear, practical guidelines on documenting patient care in all nursing practice settings, the leading clinical specialties, and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals, and new information on charting pain management. Hundreds of filled-in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards, and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards, and documenting outcomes and interventions for key nursing diagnoses.

Thinking, Doing Caring. In every chapter, you'll first explore the theoretical knowledge behind the concepts, principles, and rationales. Then, you'll study the practical knowledge involved in the processes; and finally, you'll learn the skills and procedures. Student resources available at DavisPlus (davisplus.fadavis.com).
