The Freezer Cooking Manual: A Month of Meals Made Easy from 30 Day Gourmet presents a comprehensive cooking system that teaches busy cooks the art of spending one day assembling and freezing a month's worth of delicious and nutritious entrees, side dishes and desserts. Featured on national television and radio, this "hands-on" manual includes time-saving worksheets, step-by-step instructions, healthy tips, money-saving ideas and practical advice. Updates to the 5th edition include expanded nutritional information, "mini session" tips, and access to 100's more recipes on the 30 Day Gourmet website.

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.
