Plus, its fun to build things. Here's what I built: I made it out of 2" square tubing with heavy 0.12" thick walls. The overall size of the base is 30" by 60". A friend donated some extra casters he had. The stand needs to be high enough so that the legs of your engine hoist will roll below.

~~Engine Stand Project - Laine Family~~

Says D. Eby: After a problem on the dyno, I wanted to change the cam to one that I could use with a stock valve train - I also wanted to break-in the new cam and lifters before installing the engine - I altered an engine stand to serve as an Engine Run Stand.

~~How To Turn an Engine Stand into an Engine Run Stand~~

THE BEST DAMN ENGINE STAND. THAT MONEY CAN'T BUY . As I stripped the engine of intake, heads, oil pan and water pump... I finally removed enough weight (about 250 #s) to force the stand to let me roll the block over to get the crank out and punch out the pistons... the bare block was just about the max that my old blue stand could endure.

~~THE BEST DAMN ENGINE STAND - jniolon.classicpickup.com~~

DETAILS. The Haynes Build Your Own (appx. \$43) is a diminutive four-cylinder internal combustion model. Its see-through plastic housing allows the observer to watch all the inner workings of a motor, offering an understanding of the type of engine that powers so much of our world. Makes realistic ignition sounds.

~~Top 10 Engine Model Kits of 2020 | Video Review~~

Getting started on the base. (When attaching parts during construction, pre-drill the holes before driving the screws.) Start by cutting four pieces of 2x4: two pieces that are 36" long, and two pieces that are 24" long. The 36" pieces will form the base of the motor stand.
