Many Compaq Presarios are identified on the front of the computer by a series number rather than the actual model number. For example, your Presario may be labeled with 5000 on the front of the case, but it is actually part of a 5000 series PC. The correct model number may be 5WV283.

about 5 seconds by itself May be your reset button is pressed on....so you better unscrew your computer and then remove the plugged in botton that is lined from reset button (u can follow the layout diagrams inside the computer).....i think it may help you... later you can...

~~A diagram of the inside of my computer~~

My review is based on a Presario 5000 with a 933 MHz Pentium III, 256K L2 cache. Be aware that there are many models in the 5000 series and a lot of them are much lower powered. The Athlon and PIII models are the best, though, and came in the highest speeds.
