School counseling staff, as well as teachers and others running advisory or related groups, will find this manual to be useful for helping students succeed in middle school. At this critical point in their lives, young adolescents can move in a positive and hopeful direction, or they can enter into a negative, downward spiral. SDM/SPS provides students with basic school survival skills and research-based strategies for responsible decision making and problem solving. SDM/SPS uses a positive, project-oriented approach to help reduce school violence, foster social and emotional intelligence, improve academic effort and attention, develop multicultural perspectives, and prevent at-risk students from giving up on school. The authors present a thoroughly tested and effective approach for working with a broad spectrum of learners, including those with emotional and behavioral disorders. The manual includes numerous reproducible worksheets and assessment tools for tracking progress. It provides strategies for supporting academic achievement, improving media literacy skills, encouraging parent involvement, and implementing a school-community service project.

Over 180 field-tested lesson plans, learning activities, and assessments for implementing a skills-based approach in your class. This resource is aligned with the National Health Education Standards and comes with a web resource that includes English and Spanish versions of the book's reproducible forms.

This book offers practical strategies to help primary and secondary educators coach and mentor their students to become co-teachers, decision-makers, and advocates. In this unique resource for educators who are attempting to meet the needs of a diverse student population in mixed-ability classrooms, Richard A. Villa, Jacqueline S. Thousand, and Ann I. Nevin anchor practical examples within the current theories of learning and evidence-based research on these non-traditional student roles. Readers will find: - Practical, hands-on resources - Assessment tools - Lesson plans in user-friendly formats - Many personal case studies Collaborating With Students in Instruction and Decision Making provides easy-to-implement methods that can be used in classrooms, school buildings, or across school districts.

The book's content is ideal for staff development personnel and school district curriculum specialists as well as faculty in colleges of education dedicated to the development of the teaching, decision making, and the advancement of students' advocacy skills.

Lesson Planning for Skills-Based Health Education is a highly practical and useful resource for middle school and high school health educators looking for innovative and tried-and-true ways to implement a skills-based approach to health education. The text—written by renowned authors Sarah Benes and Holly Alperin, along with experts in the field, including many SHAPE America Teacher of the Year honorees—offers effective, skills-based learning activities, lessons, units, and assessments that you can use in your classroom as they are or with modifications to meet the needs of your students. You can use this text to build a completely new curriculum or to supplement your existing curriculum, providing a smooth transition from a content-based approach to a skills-based approach. The authors explain the rationale and foundation for making that transition, putting the lesson plans, activities, and assessments in context for you as you learn how to implement a skills-based approach. The 64 lessons and activities in Lesson Planning for Skills-Based Health Education have been created by the authors and a number of experienced teachers broadly recognized for their expertise in skills-based health education, organized to map to the skills in the National Health Education Standards and aligned with a five-step skill-development model designed to be flexible and adaptable to meet the needs of a wide range of educators, from those wanting a complete new curriculum to those wanting to simply supplement their existing curriculum while meeting the needs of all students. Lesson Planning for Skills-Based Health Education is an ideal companion to *The Essentials of Teaching Health Education*, another book by Benes and Alperin, which presents teaching and assessment strategies for planning and implementing a skills-based approach to teaching health education. Together, these two books can help you effectively teach skills-based health education from day one. Lesson Planning for Skills-Based Health Education offers a detailed, easy-to-use learning activity template and employs a teacher-friendly format that has been proven effective in the field. It comes with a web resource that has digital versions of the many reproducible forms in the text. The text is organized into two parts. Part I delves into key aspects of planning, implementing, and assessing a skills-based approach, offering you a strong foundation in the core concepts of the approach. Each of the part II chapters is devoted to a skill addressed in the National Health Education Standards, providing you with the following material: An overview of the skill Key considerations for teaching the skill A unit outline Assessments Lesson plans Learning activities Lesson Planning for Skills-Based Health Education offers you all you need to put a skills-based approach into practice: the solid foundational information that explains the concepts and the resources, tools, and strategies to help you implement the lesson plans and activities that will aid your students in developing proficiency in the skills emphasized in the national standards. Through this text, you will be able to offer instruction that challenges your students and provides them with opportunities to meet the standards in a classroom environment that is engaging, thought provoking, and relevant.
