In the first book systematically to give evidence of conjugal co-rule at an Italian Renaissance court, and the first full length scholarly study of Isabella d'Este and Francesco Gonzaga, Sarah Cockram shows their relationship in an entirely new light. The book draws on (and presents) a large amount of unpublished archival material, including almost unprecedented surviving correspondence between and around these Renaissance princely rulers. Using these sources, Cockram shows Isabella and Francesco's strategic teamwork in action, illuminating tactics of collaboration and dissimulation. She also reveals behind-the-scenes diplomatic activity; court procedures; sexual politics and seduction; gift-giving and network-building; rivalries, intrigues and assassinations. Several epistolary themes emerge: insights into the couple's communication practices and double-dealing, their use of intermediaries, and attention to security matters. This book's analysis of Isabella's co-rule with her husband, supported by other members of the Gonzaga dynasty, sees her sometimes in the role of subordinate partner, sometimes guiding the couple's actions. It shows how, despite appearances at times, the couple shared common diplomatic policy as well as human, material, and cultural resources; joint administration; and the exercise of authority and justice. Thus emerges a three-dimensional picture of the mechanisms of power and power sharing in the age of Machiavelli.

Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The first comprehensive guide to women's promotion and use of textual culture, in manuscript and print, in Renaissance Italy.

"This is the first published English translation of Francesco Alfieri's fencing treatise: "La Scherma", first published in Padua in 1640. Alfieri was the Master at Arms at the Accademia Delia in Padua, Italy from 1632. The Delia was a school attached to the University of Padua teaching young gentlemen military skills, mathematics and the martial arts of self defence. It is not widely appreciated that Europe has martial arts traditions that are centuries old. Contained within this book is a description of one of these European combat systems ~ the art of fighting with the Rapier ~ a long, slender, civilian sword designed for self defence and dueling. The ability to wield such a weapon with skill was a matter of vital importance in an age when the defence of honour and, by definition, the immortal soul, could be more important than life itself. Alfieri's concise system is a very practical

and effective way to address this need. It is an excellent resource for all students of historical swordplay and anyone interested in the martial arts of Renaissance Europe." -- Amazon.com

An exploration of the influence of the charismatic Milanese art theorist on his contemporaries in the field of drawing, painting, printmaking, decorative arts, and sculpture.

Provides information on copyright and intellectual property law for libraries.

This book provides guidance for the bassist as well as the percussionist and rhythm guitarist on creating individual reggae grooves. The numerous challenging 2 and 4-measure rhythm patterns make a great rhythm reading workout, and the advice the author provides on equipment selection and rhythmic styles will be appreciated by the whole band. The audio recording available online features a full rhythm section both with and without the bass part, so you can jam as part of the group. Written in both standard notation and tablature

Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be " ...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem... " the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on " inherent pucker " (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem.

Medicine and the Inquisition offers a wide-ranging and subtle account of the role played by the Roman, Spanish and Portuguese Inquisitions in shaping medical learning and practice in the early modern world.

Ten essays by eminent scholars in Renaissance studies to celebrate the work of Robert Black. These essays analyze education, humanism, political thought, printing, and the visual arts during this key period in their development.
