communication and language, between these fields of study of the humanities and the sciences. The dictionary provides succinct definitions of the materials and technologies used to produce, modify and shape materials in the past and concise introductions to the scientific concepts and techniques now used to identify, characterize and date ancient materials and the technologies of altering them. The range of topics covered in the dictionary extends from the basic properties and characteristics of materials used in antiquity, their alteration and transformation into other materials and the fabrication of artificial materials, to modern methods for ascertaining their composition and authenticity, dating them and establishing their geological and geographic
