## Show Ep.135 **Why IBM Flash Systems** Drive Away Protection System Ews

At the time of introduction the system was referred to as Electronic Drive Away Protection which in German is Elektronische Wegfahrsperre or EWS. The EWS I system consisted of the following components:

- Starter Immobilization Relay
- Door Lock Cylinders and Switch
- General Module
- Board Computer (if equipped)
- Transmission Range Switch

### Drive Away Protection System (EWS) - Unofficial BMW

The purpose of the Drive Away Protection system was to reduce vehicle theft as mandated by the European Insurance Commission

to combat the high theft rate in European Countries. This first version of the Drive Away Protection System added a circuit from the General Module to the DME. The added circuit was spliced into the existing code function from the Board Computer (BC) to the DME.

## Introduction For (EWS) Drive Away Protection System

The function of the EWS II module is to provide improved drive away protection for the vehicle and it incorporates many features of previous systems:

- Lock out of the starter when the code function of the BC is set.
- Disable injection and ignition through the DME.
- Prevent starter engagement with engine
