Statics is a branch of
mechanics which

studies the effects and distribution of forces of rigid bodies which are and remain at rest. In this area of mechanics, the body in which forces are acting is assumed to be rigid. The deformation of non-rigid bodies is treated in Strength of Materials. Topics in Statics: Resultant of

into two major parts, namely Statics and Dynamics. Statics is primarily concerned to system of forces applied to body at rest. It includes the following topics:
resultant of force system; equilibrium of force system; cables; friction; trusses; frames; centroid; center of
