The aim of the symposium on which this text is based was to discuss the current practices of the fish-farming industry and search for sustainable directions for future development. Topics covered include: resources for fish food in aquaculture; genetics; and environment and aquaculture interaction.

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army—Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the "Turning the Tide" project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

This book will appeal not only to historians and geographers, but to many who maintain a deep interest in the British countryside and its past, and to those who continue to share a fascination for the Second World War, in particular the 'home front'. It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago.

On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture's crucial role in achieving the future we want.

The I Can Fly Reading Program, Books A & B, are lesson-based workbooks which provide lessons in phonics for children who are just beginning to learn to read. The methods used in this program are based on the Orton-Gillingham approach, in that every sound and spelling rule is taught in a structured, cumulative manner with repetition. Perfect for all young students, especially those who have learning delays, speech and language difficulties, APD, autism, and those with a family history of dyslexia and may be dyslexic. This program is perfect for homeschooling, tutoring and for parents who need to help their children. There's no training needed, and the program is step-by-step, requiring no planning or lesson preparation. This program can also be used in the classroom with our Kindle version for the Smart Board or for remote teaching. All that is needed is the Kindle App (which can be used on PCs and Macs). A web app is available to augment the program. Go to: ICanFlyReadingProgram (dot com). This book is colorful, with large text and a simple layout that is created to be visually appealing to children. The program comes in two books, Book A and Book B. Book A: the alphabet, consonants, vowels, consonant blends, FLOSS words, high frequency words, 'ch', 'sh', 'th', 'ck', 'ng', 'nk', 'VCV', 'oo', 'ou' and 'ow' as /ou/. Book B: 'ow' as long 'o', 'ay', 'ar', 'er', 'ir', 'or', 'ur', 'oy', 'oi', long vowel teams, the letter 'y', words ending with 'ie', 'ew', long 'o' words, long'i' words, 'qu', 'au', 'aw', 'alk', 'ct', 'ea' as short 'e', protecting short vowels, and past tense words.

Published in the year 1971, The History of Education in Ghana is a valuable contribution to the field of History.

We identify current challenges for creating stable, yet efficient financial systems using lessons from recent and past crises. Reforms need to start from three tenets: adopting a system-wide perspective explicitly aimed at addressing market failures; understanding and incorporating into regulations agents' incentives so as to align them better with societies' goals; and acknowledging that risks of crises will always remain, in part due to (unknown) unknowns – be they tipping points, fault lines, or spillovers. Corresponding to these three tenets, specific areas for further reforms are identified. Policy makers need to resist, however, fine-tuning regulations: a "do not harm" approach is often preferable. And as risks will remain, crisis management needs to be made an integral part of system design, not relegated to improvisation after the fact.

---

This book outlines the findings and suggestions of the Law and Society Association's International Research Collaborations, which focused on the African Union's Agenda 2063. This outlined the ideal Africa aspired to by the year 2063: 'the Africa we want'. The authors examine socio-economic rights issues and their impact on developing a strong educational agenda that can drive Africa to realize Agenda 2063. As Africa's

development has remained slow in the face of many challenges, the need to embrace good governance, rule of law and human rights obligations are major tools to realize the continent's potential. The project focuses in particular on the central place of education law and policy in achieving the goals of Agenda 2063.
