In this answer, you delete everything that matches the file name in the entire drive. So if you wanted to delete some dll files in your project, and you mistakenly type del /s c:*.dll, then you're up for a very bad surprise. Never run such commands on the whole drive, unless absolutely necessary. – Laf Oct 19 '16 at 13:01

cmd - Delete all files of specific type (extension ...
Once there, type in the following command (assuming to delete .tmp files): DEL /S /Q *.TMP. This command will delete all the *.TMP files from the folder you are in, and all of the subfolders. Here, /S : Instructs to delete files from all subdirectories. /Q : Deletes files quietly, i.e., without prompts.

Recursively Delete a Specific File Type from all ...
Unique file type specifiers. A unique file type specifier is a string that describes a type of file that may be selected by the user in an <input> element of type file.Each unique file type specifier may take one of the following forms: A valid case-insensitive filename extension, starting with a period (".") character.

<input type="file"> - MDN Web Docs
The reason the text field is there is because it shows the user the file path after they browse and select their file. – k to the z Apr 28 '11 at 3:43

How to customize <input type="file">? - Stack Overflow
PowerPoint uses three main file types: Presentation, Template, and Slide Show. For the most part, you can construct and deliver simple presentations without ever having to deal with the differences among these types of files. But before you can effectively use PowerPoint's advanced formatting options, you have to understand its file formats.

PowerPoint File Types : MS PowerPoint
File Type Verifier is a program that is available as part of the Windows 7 SDK. It is designed to help developers who create custom Windows File Types to detect potential issues with their file types. Although the File Type Verifier runs only on Windows 7 and later, the rules that the File Type Verifier enforces apply to all versions of Windows ...

The report "Offering help to quit tobacco use" tracks the status of the tobacco epidemic and interventions to combat it. The report finds that more countries have implemented tobacco control policies, ranging from graphic pack warnings and advertising bans to no smoking areas. About 5 billion people - 65% of the world's population - are covered by at least one comprehensive tobacco control measure, which has more than quadrupled since 2007 when only 1 billion people and 15% of the world's population were covered.
Chronic respiratory diseases, such as asthma and chronic obstructive pulmonary disease, kill more than 4 million people every year, and affect hundreds of millions more. These diseases erode the health and well-being of the patients and have a negative impact on families and societies. This report raises awareness of the huge impact of chronic respiratory diseases worldwide, and highlights the risk factors as well as ways to prevent and treat these diseases.

The dramatic increase in chronic conditions, including noncommunicable diseases, mental disorders, and certain communicable diseases such as HIV/AIDS demands creative action. The WHO created this document to alert decision-makers throughout the world about these important changes in global health, and to present health care solutions for managing this rising burden.
The tracheobronchial tree is open to the environment surrounding the body. Respiration has thus the essential bearing on general morbidity, vulnerability to disease and immunity. Further, respiratory function shapes the neuropsychological responses to succumbing to disease, controls the mind-to-body interaction and sets the perception of quality of life. The chapters of this book deal with the preventable drivers of poor respiratory health, the role of health information technology, the improvement in health care delivery and the integration of respiratory health and behavioral health services. Innovative strategies to promote prevention, care coordination and care integration as well as to align disease acceptance and quality of life measures also are tackled. Maintaining respiratory health is of rising research interest as a way of preventing a disease or a non pharmacological therapeutic succor. The book will be of interest to clinicians, family practitioners and medical researchers.

This book focuses on pulmonary arterial hypertension (PAH, Group 1) and chronic thromboembolic pulmonary hypertension (CTEPH, Group 4) among the various groups of pulmonary hypertension (PH) whose classification was updated into five major categories at the 5th World Symposium held in Nice, France, in 2013. Readers will find recent progress, methods, and up-to-date information on PH mechanisms, diagnostic images, and treatment in the management of PH.This volume, with contributions by leading researchers worldwide in the field , consists of five parts, starting with the fundamentals of PH, then pathophysiology and genetics, treatment, and right ventricular function.

Research in the past five years suggests a bleak picture of the health dangers of smoking, with tobacco the biggest single killer of all forms of pollution. It is estimated that one person dies every ten seconds due to smoking-related diseases. This publication considers the history and current position regarding tobacco use, as well as providing some predictions for the future of the tobacco epidemic upto the year 2050. It contains a number of full-colour world maps and graphics to illustrate the variations between countries and regions. Issues discussed include: tobacco prevalence and consumption; youth smoking; the economics of tobacco farming and manufacturing; smuggling; the tobacco industry, promotion, profits and trade; smokers' rights; legislative action such as smoke-free areas, tobacco advertising bans and health warnings.

In the last ten years the pediatric neurosurgeon has witnessed a real revolution in the diagnosis and treatment of pediatric hydrocephalus, the most frequently encountered condition in everyday clinical practice. The evolution of MRI and the advent of neuroendoscopic surgery have resuscitated the interest in the classification, etiology and pathophysiology of hydrocephalus. The book offers an updated overview on the recent progress in this field, and a new approach to hydrocephalus: the reader will find in it a modern and new presentation of an old disease, where genetics, endoscopy, cost-effectiveness analyses and many other aspects of the various therapies are extensively discussed. The volume will be useful not only for neurosurgeons, but for all specialists interested in the various aspects of hydrocephalus: pediatricians, radiologists, endocrinologists, pathologists and geneticists.

Contains all of Freud's 'cocaine papers,' his letters, notes, dreams, and recollections on the subject, together with the most pertinent writings from the 19th century to the present on Freud and cocaine. Bibliography: p. 399-400. Includes index.

One of the greatest accomplishments in the history of cryptography occurred in 1940 when a Swedish mathematician broke the German code used for strategic military communications. This story has all the elements of a classic thriller: a desperate wartime situation; a moody and secretive mathematical genius with a talent for cryptography; and a stunning mathematical feat, mysterious to this day. Arne Beurling, the man who inherited Einstein's office at Princeton's Institute for Advanced Study, was the figure who played this role at a crucial moment in world history. The author, Bengt Beckman, for many years was the head of the cryptanalysis department of the Swedish signal intelligence agency. He has crafted a book that a reader at any level of mathematical sophistication will thoroughly enjoy. It will appeal to a broad audience of readers, from historians and biography buffs to mathematicians to anyone with a passing interest in cryptography and cryptanalysis.
