Barcoding analysis and taxonomic revision of Goliathus ...

It has been mistakenly classified as a giant cockroach by some people, but it is a pure beetle, with a  
genus of its own, Titanus. It is a member of the Cerambycidae family, or "longhorn beetles". Adults  
grow as long as 16.7 cm (6.5 in) and their mandibles are strong enough to snap a pencil in half, or cause  
damage to a person's flesh. □ Fact Zoo. □□□ admit, □□□m scared of spiders and cockroaches, but I love  
beetles!
