A guide for parents, clinicians, and policy makers connects everyday moments and relationships in a child's life with their developing sense of values and meaning, demonstrating how children can be best positioned to become morally strong adults through an identification with loving caregivers. Reprint.

Staying busy is easy. Staying well rested-now there's a challenge. How can you keep your energy, happiness, creativity, and relationships fresh and thriving in the midst of never-ending family demands, career pressures, and the stress of everyday life? In Sacred Rest, Dr. Sandra Dalton-Smith, a board-certified internal medicine doctor, reveals why rest can no longer remain optional. Dr. Dalton-Smith shares seven types of rest she has found lacking in the lives of those she encounters in her clinical practice and research-physical, mental, spiritual, emotional, sensory, social, creative-and why a deficiency in any one of these types of rest can have unfavorable effects on your health, happiness, relationships, creativity, and productivity. Sacred Rest combines the science of rest, the spirituality of rest, the gifts of rest, and the resulting fruit of rest. It shows rest as something sacred, valuable, and worthy of our respect. By combining scientific research with personal stories, spiritual insight, and practical next steps, Sacred Rest gives the weary permission to embrace rest, set boundaries, and seek sanctuary without any guilt, shame, or fear.

A practical guide to making more informed investmentdecisions Investors often buy or sell stocks too quickly. When you baseyour purchase decisions on isolated facts and don't take the timeto thoroughly understand the businesses you are buying, stock-priceswings and third-party opinion can lead to costly investmentmistakes. Twelve 16-page books about favorite animal topics, featuring three lines of text per page to help children step up to the next reading level with ease. Includes activity book with one activity sheet for each title in the set.

A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

A look at the realities of free-market medicine in America. A Yale-trained psychiatrist, Dora Calott Wang explores the seismic shifts that have shaken the entire medical profession. Through the prism of her own research and experience, readers watch as she struggles to maintain her professional standards as health care's priorities veer away from the compassionate care of patients toward improving the bottom line. And the stories of some of her patients reveal an oft-ignored human side of our besieged system. As the medical landscape changes beneath Wang, she confronts depression and exhaustion, and fights to find the balance between work and home as it becomes ever clearer that she cannot untangle the uncertain futures of her patients from her own.
