Offers a systematic approach to technical writing for engineers and other technical professionals, while providing enough flexibility to allow their creativity to flow. Shows how to break down a large technical writing project into sub-tasks, just as any large technical design problem would be solved. Forbes gives a wealth of tips and techniques on outlining, and discusses how to write data sheets, application notes, magazine articles, speeches (including "forum" speeches and technical presentations for small groups), and technical manuals of all types. Includes techniques for completing projects when time is short.

Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December)
