## Valve Clearance Adjustment How-To (inline-4 Motorcycle ...

The valves are placed at the top of the cylinders, and open to allow the fuel mixture to enter the cylinder chamber, and then close to help create compression. The valves are opened by cams or rocker arms on the camshaft, which push the valve's tappet, which forces the valve to open. If the clearance between the valve stem and the cam or rocker arm isn't perfect, the valve will open and close at the wrong time, or may not close all the way.
