Every part of her tasted divine, but her mouth was my favorite. It was so easy to lose myself in kissing her, mostly because I could tell she was doing the same. Her body pressed against mine, and her fingernails dug into my shoulders like she was dangling off a cliff, and that was the only thing holding her up.

In her new book diet failure?the Naked Truth Nutritional/Medical Researcher Phoenix Gilman reveals why obesity is so alarmingly prevalent, as well as depression, ADD, even type 2 diabetes and heart disease. More importantly, she discloses a safe, highly effective solution to help overcome these health conditions without the use of deadly drugs! In her progressive book, Phoenix exposes the crucial Serotonin-Insulin Connection to long-term weight loss. Clinical studies substantiate that serotonin, a major neurotransmitter, plays a critical role in our ability to lose weight!and keep it off. However, serotonin also plays a critical role (directly or indirectly) in alleviating depression, insomnia, ADD, type 2 diabetes, even high blood pressure, heart disease, and suicidal behavior. But the key to all of this is understanding how to safely maintain this neurotransmitter. Phoenix says, ?Never before have I come across such compelling information that could so dramatically help millions of people. This research is absolutely vital to overcoming obesity!and many other serious health conditions.?

Phoenix Gilman: Diet Failure? The Naked Truth

In 1929, nearly four hundred years after the deaths of Saints Thomas More and John Fisher, G.K. Chesterton observed in words equally attributable to Fisher, "Blessed Thomas More is more important at this moment than at any moment since his death, even perhaps the great moment of his dying; but he is not quite so importnt as he will be in a hundred years." Judge Robert J Conrad, Jr. anticipates Chesterton's one-hundred-year mark in a collection of stories from the lives of More and Fisher, demonstrating how their sanctity and integrity carried them and those who loved them through tumultuous and heart-wrenching times which, perhaps surprisingly, bear a striking resemblance to the present epoch. At first blush, nothing could appear more different than the pre-industrial sixteenth century and the tech-centered modern era. But a closer examination presents a similar tale of political maneuvering and hostile hearings, legal corruption, viral pandemics, riots, suppression of speech, loss of religious liberty, and a profound indifference for truth. Judge Conrad effortlessly weaves together tales of both men and what made them who they were--family, faith, friendship, oaths, vocation, detachment, conscience--inviting those who strive for holiness down the same narrow path these two martyrs walked with a clarity founded upon the truth of Christ's Church, and a wit that charmed even their persecutors. Both these men refused to consent to the theological farce that would permit the king's divorce and remarriage and drive a wedge into the unity of the Christian world, and both paid for their convictions with their lives. More died the king's good servant and God's first. Fisher approached his execution with joy befit for a wedding. And yet, both stand today, long after they are gone, as models of courage in a time when it is desperately needed. Discover in this volume of powerful stories two saints whose lives could not be timelier for the present age.

This book tells the story of Germany's strategic air offensive against Britain, and how it came to be neutralized. The first Zeppelin attack on London came in May 1915 -- and with it came the birth of a new arena of warfare, the 'home front'. German airships attempted to raid London on 26 separate occasions between May 1915 and October 1917, but only reached the capital and bombed successfully on nine occasions. From May 1917 onwards, this theatre of war entered a new phase as German Gotha bombers set out to attack London in the first bomber raid. London's defences were again overhauled to face this new threat, providing the basis for Britain's defence during World War II. This comprehensive volume tells the story of the first aerial campaign in history, as the famed Zeppelins, and then the Gotha and the massive Staaken 'Giant' bombers waged war against the civilian population of London in the first ever 'Blitz'.
