Linux Malware Incident Response: A Practitioner's Guide to ...

The following is an excerpt from the book Linux Malware Incident Response written by Cameron Malin, Eoghan Casey and James Aquilina and published by Syngress. This section discusses volatile data collection methodology and steps as well as the preservation of volatile data. VOLATILE DATA COLLECTION METHODOLOGY

Linux Malware Incident Response - SearchSecurity

Description: Older (non-proprietary) versions of the Helix Incident Response CD-ROM include an automated live response script (linux-ir.sh) for gathering volatile data from a compromised system. linux-ir.sh sequentially invokes over 120 statically compiled binaries (that do not reference libraries on the subject system). The script has several shortcomings, including gathering limited information about running processes and taking full directory listings of the entire system.
