Prior work has shown that both group-level atrophy in clinical dementia syndromes and complex neurological symptoms in patients with focal brain lesions localize to brain networks.

Here, we use a new technique termed 'atrophy network mapping' to test the

Read Free Localization Of Clinical Syndromes In

hypothesis that single-subject atrophy maps in patients with a clinical diagnosis of Alzheimer's disease will also localize to syndrome-specific and symptom-specific brain networks.

The capsular warning syndrome
(CWS) is a subtype of transient
ischemic attack characterized by its
recurrent nature, absence of cortical
signs, and high probability of early
capsular stroke.

Localization of Clinical Syndromes
Using DWI: Two Examples ...

The mechanistic interpretation of
network localization remains unclear.
One possibility is that clinical
symptoms in neurological diseases

Read Free Localization Of Clinical Syndromes In

can result from dysfunction in a connected but undamaged brain region through a mechanism termed diaschisis (Carrera and Tononi, 2014). Alternatively, network localization may suggest that a complex symptom localizes to the interactive functioning of the entire network,

Read Free Localization Of Clinical Syndromes In

rather than any specific location or node within that network.
