Manual Therapy NAGS SNAGS MWMS etc 7th Edition - New

Mulligan Concept. Initially trained by Kaltenborn, Brian Mulligan took traditionally sustained translations and added patient generated active movement to achieve pain free movement and function. Brian Mulligan\u2019s concept of mobilizations with movement (MWMS) in the extremities and sustained natural apophyseal glides (SNAGS) in the spine were revolutionary due to this concurrent application of both therapist applied forces and patient generated movement.

Mulligan Concept \u2192 Mulligan Concept - Manual Therapy

NAGs and SNAGs are mobilisation techniques and are used as part of the Mulligan Concept. NAGs are used on the cervical spine (neck) as well as the upper thoracic spine (upper back). SNAGs are used throughout the spine, rib cage and sacroiliac joint (tail bone). They are also used to treat limb problems that have occurred as a result of spinal problems. SNAGs are gliding mobilisations and should be performed pain free. NAGs mobilise joints mid way through range of movement whilst SNAGs ...

Nags And Snags - Manual Therapy - Physiotherapy ...

The official International Web Site The Mulligan Concept of Mobilisation with Movement (MWM) is a unique manual therapy treatment approach combining mobilisation with active movement or function. Fundamentally a patient\u2019s pain, restriction or functional loss is eliminated when appropriate mobilisation forces are applied during movement.
