Biblical interpretation is a rational and spiritual process that attempts to understand an ancient inspired writer in such a way that the message from God may be understood and applied in our day. The spiritual process is crucial but difficult to define. It does involve a yieldedness and openness to God. There must be a hunger (1) for Him, (2) to know Him, and (3) to serve Him. This process involves prayer, confession, and the willingness for lifestyle change. The Spirit is crucial in the interpretive process, but why sincere, godly Christians understand the Bible differently is a mystery. The rational process is easier to describe. We must be consistent and fair to the text and not be influenced by our personal, cultural, or denominational biases. We are all historically conditioned. None of us are objective, neutral interpreters. This commentary offers a careful rational process containing four interpretive principles structured to help us attempt to overcome our biases. First Principle The first principle is to note the historical setting in which a biblical book was written and the particular historical occasion for its authorship (or when it was edited). The original author had a purpose and a message to communicate. The text cannot mean something to us that it never meant to the original, ancient, inspired author. His intent-not our historical, emotional, cultural, personal, or denominational need-is the key. Application is an integral partner to interpretation, but proper interpretation must always precede application. It must be reiterated that every biblical text has one and only one meaning. This meaning is what the original biblical author intended through the Spirit's leadership to communicate to his day. This one meaning may have many possible applications to different cultures and situations. These applications must be linked to the central truth of the original author. For this reason, this study guide commentary is designed to provide a brief introduction to each book of the Bible. Second Principle The second principle is to identify the literary units. Every biblical book is a unified document. Interpreters have no right to isolate one aspect of truth by excluding others. Therefore, we must strive to understand the purpose of the whole biblical book before we interpret the individual literary units. The individual parts-chapters, paragraphs, or verses-cannot mean what the whole unit does not mean. Interpretation must move from a deductive approach of the whole to an inductive approach to the parts. Therefore, this study guide commentary is designed to help the student analyze the structure of each literary unit by paragraphs. Paragraph and chapter divisions are not inspired, but they do aid us in identifying thought units. Third Principle The third principle is to read the Bible in different translations in order to grasp the widest possible range of meaning (semantic field) that biblical words or phrases may have. Often a phrase or word can be understood in several ways. These different translations bring out these options and help to identify and explain the manuscript variations. These do not affect doctrine, but they do help us to try to get back to the original text penned by an inspired ancient writer. Fourth Principle The fourth principle is to note the literary genre. Original inspired authors chose to record their messages in different forms (e.g., historical narrative, historical drama, poetry, prophecy, gospel [parable], letter, apocalyptic). These different forms have special keys to interpretation. This Textbook offers a quick way for the student to check his interpretations. It is not meant to be definitive, but rather informative and thought-provoking. These principles have helped me to overcome much of my historical conditioning by forcing me to struggle with the ancient text. My hope is that it will be a blessing to you as well. Dr. Bob Utley

This is a classic that has stood the test of time. For forty-five years, seminary students and pastors have benefited from the principles found in this book. Two of Koller's popular texts, Expository Preaching without Notes and Sermons Preached without Notes, are combined in a single volume that allows preachers to prepare and deliver sermons without being tied to a manuscript or even outlines or notes. Among the eighteen topics discussed are the biblical conception of preaching, the advantages of preaching without notes, homiletical devices, the importance of structure, and the systematic filing of materials. Now repackaged for the next generation of preachers, with a foreword by current Northern Seminary preaching professor Michael J. Quicke, How to Preach without Notes is poised to continue its history of strong and steady sales.
