From #1 New York Times bestselling author Terry McMillan comes a “frank, no-holds-barred, humorous look at African-American midlife” (The Seattle Times). “Being a lifetime wife and mother has afforded me the luxury of having multiple and even simultaneous careers: I've been a chauffeur. A chef. An interior decorator. A landscape architect, as well as a gardener. I've been a painter. A furniture restorer. A

Mechanics of Machines is designed for undergraduate courses in kinematics and dynamics of machines. It covers the basic concepts of gears, gear trains, the mechanics of rigid bodies, and graphical and analytical kinematic analyses of planar mechanisms. In addition, the text describes a procedure for designing disc cam mechanisms, discusses graphical and analytical force analyses and balancing of planar mechanisms, and illustrates common methods for the synthesis of mechanisms. Each chapter concludes with a selection of problems of varying length and difficulty. SI Units and US Customary Units are employed. An appendix presents twenty-six design projects based on practical, real-world engineering situations. These may be ideally solved using Working Model software.

"In this insightful and deeply personal work, Kathleen Norris, an award-winning poet and author of both *Dakota: A Spiritual Geography* and *The Cloister Walk*, draws on her life experiences, her poetry and her love of the Benedictine tradition to discuss the mysterious way that the daily or "quotidian" can open us to the transforming presence of God." "This volume is the text of the 1998 Madeleva Lecture in Spirituality, sponsored by the Center for Spirituality at Saint Mary's College, Notre Dame, Indiana."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
