## Multivariable

### Mathematics

Below is a sample Maple session, in which we do some simple arithmetic:

```
>2+2; > quit
```

In this session you computed  $2+2$  by typing a one-line command next to Maple's command prompt `>`. This is where

# Online Library

## Multivariable

Mathematics

you type what you want Maple to compute. You then typed your Return (Unix system) or Enter (Mac version) to tell Maple to execute your command.
