Nervous System II: Anatomy Review Interactive Physiology® Quiz:
Nervous System II: Anatomy Review ... Will signals from the parasympathetic nervous system (PNS) cause smooth muscles in the small intestine to increase or decrease contractions? If a neuron synapses with the dendrite of another neuron and excites it, this will lead to an _____ on ...

Nervous System II: Anatomy Review

- Signals in the autonomic nervous system travel over a two-neuron chain to their effector organ.
- The second neuron, or autonomic motor neuron, contacts the organ.
- Signals from some autonomic motor neurons cause the heart rate to increase.
- Signals from other neurons slow the heart.
- Action potentials to the heart may excite or inhibit it.
