Jean Bardou died in 1852. The JOB brand was auctioned in August 1853 and bought for 16,000 francs by Jean Bardou's son Pierre Bardou. His brother Joseph Bardou had formed a separate company making "le Nil" cigarette papers, with a laughing elephant as its logo. In January 1854 Pierre began making his own paper in Perpignan.

Root and Park examine the plight of workers displaced from two paper mills and their paths to reemployment, retirement decisions, and the personal struggles they faced as a result of their dislocations. They provide insightful, personal portraits of workers that are representative of the hundreds who lost their jobs as a result of two mill closings—one in Sartell, Minnesota, and the other in Bucksport, Maine. In addition, the authors describe the types of assistance that were offered to the workers displaced by the mill closings, dedicate a chapter each to the plights of female workers and of spouses who were both displaced by the closings, discuss the importance of community when economic displacement occurs, compare the experience of a mill closing in Canada with the Maine and Minnesota closings, and conclude with ways that society can be more proactive in assisting workers who suffer job displacement and the economic and psychological impacts that so often occur as a result. Overall, this book adds a human perspective to the problems facing dislocated workers, not only in the shrinking paper industry but also in other contracting industries in the United States.

Describes the kinds of work that goes on inside a paper mill, and suggests questions one might ask oneself before pursuing a career inside a mill.

From bestselling writer David Graeber—“a master of opening up thought and stimulating debate” (Slate)—a powerful argument against the rise of meaningless, unfulfilling jobs...and their consequences. Does your job make a meaningful contribution to the world? In the spring of 2013, David Graeber asked this question in a playful, provocative essay titled “On the Phenomenon of Bullshit Jobs.” It went viral. After one million online views in seventeen different languages, people all over the world are still debating the answer. There are hordes of people—HR consultants, communication coordinators, telemarketing researchers, corporate lawyers—whose jobs are useless, and, tragically, they know it. These people are caught in bullshit jobs. Graeber explores one of society’s most vexing and deeply felt concerns, indicting among other villains a particular strain of finance capitalism that betrays ideals shared by thinkers ranging from Keynes to Lincoln. “Clever and charismatic” (The New Yorker), *Bullshit Jobs* gives individuals, corporations, and societies permission to undergo a shift in values, placing creative and caring work at the center of our culture. This book is for everyone who wants to turn their vocation back into an avocation and “a thought-provoking examination of our working lives” (Financial Times).

Histories of the civil rights movement have generally overlooked the battle to integrate the South's major industries. The paper industry, which has played an important role in the southern economy since the 1930s, has been particularly neglected. Using previously untapped legal records and oral history interviews, Timothy Minchin provides the first in-depth account of the struggle to integrate southern paper mills. Minchin describes how jobs in the southern paper industry were strictly segregated prior to the 1960s, with black workers confined to low-paying, menial positions. All work literally had a color: every job was racially designated and workers were represented by segregated local unions. Though black workers tried to protest workplace inequities through their unions, their efforts were largely ineffective until passage of the 1964 Civil Rights Act opened the way for scores of antidiscrimination lawsuits. Even then, however, resistance from executives and white workers ensured that the fight to integrate the paper industry was a long and difficult one.
