Perception in architecture and the environment, which is the main concern of this thesis, can be counted as one part of the whole subject of perception. However, currently there is a great lack of application and utilisation of knowledge of that field. One can say that dissatisfaction with undesirable results in the design of our environment and with its design courses, were the main motive ...

The application of perception theory in architecture and ...
This thesis presents a new approach to study urban spatial perception in an efficient, automated, and scalable way. It explores the use of novel tools developed for online surveys and data visualization.

Mapping urban perception - MIT Architecture
Today, I'll investigate the question of what happens to our brain leading to delusional perception of Architecture. Across history, architects have used the concept of the so-called forced...

Perception Architecture Urban - download truyeny.com
Abstract. The character of urban space is being recreated by changes, which are taking place very fast. Especially buildings that are a part of the complementary development have an important influence on its composition. With the penetration into the historical and compact urban fabric, the complementary buildings are transforming the face of well-known places that often have a rich history which was permanently inscribed in the memory of the inhabitants of many generations.

Analysis of The Urban Space Perception, Transformed Under ...
Mary Ben Bonham Miami University, Oxford, Ohio ABSTRACT: How architects measure light is changing. Human perception of light is ostensibly the reason why spaces are illuminated, yet primary lighting guidelines used by architects measure how much light is falling on a surface, not the distribution of light to the human eye (Cuttle 2011). Recent lighting research related to human visual perception introduces new ideas that, while they challenge the status quo of lighting practice, build on ...

Miriam Miecek is a trained architect and a Researcher at the University of Hanover. She also works as research manager at the Aedes Network Campus Berlin. She studied Architecture at the University of Arts Berlin and founded the TRANSIT LOUNGE, an interdisciplinary residency program for artists and architects from Berlin and Australia.

PERCEPTION in Architecture: HERE and NOW - Cambridge ...
The visual perception of this town is reflected in its architectural elements. Silva (2006) argued that given the limited visual perception of historic towns, particularly on their physical elements, special preservation programs must be launched to improve the image of these areas. Therefore, an empirical study on the historic town of Kumbakonam must be performed to understand the significance of the architectural elements of their built heritage.

Visual perception on the architectural elements of the ...
Perception in architecture 1. PERCEPTIONARCHITECTUREINS P A C E S 2. Different researches in the fields of psychology, behavioral studies, E-B studies, architecture and other fields have tried to define and explain the emotional impacts space has over a person. Urban Planning architecture and design

Perception Architecture Urban
Les technologies de l'information et des télécommunications transforment notre manière de voir, de représenter et de percevoir. C'est toute une culture du regard qui change. Le corps humain s'adapte tant bien que mal à ces procédés technologiques qui constituent de fait une révolution aussi importante que le passage de l'oralité à la lecture silencieuse. Il est temps de comprendre ces données culturelles et physiologiques inédites et d'en saisir les modes opératoires, pour les apprécier, les réorienter ou les dénoncer. Un livre de fond, une réflexion actuelle, un instrument pour comprendre ce que nous ressentons tous.

Scale is a word which underlies much of architectural and urban design practice, its history and theory, and its technology. Its connotations have traditionally been linked with the humanities, in the sense of relating to human societies and to human form. 'To build in scale' is an aspiration that is usually taken for granted by most of those involved in architectural production, as well as by members of the public; yet in a world where value systems of all kinds are being questioned, the term has come under renewed scrutiny. The older, more particular, meanings in the humanities, pertaining to classical Western culture, are where the sense of scale often resides in cultural production. Scale may be traced back, ultimately, to the discovery of musical harmonies, and in the arithmetic proportional relationship of the building to its parts. One might question the continued relevance of this understanding of scale in the global world of today. What, in other words, is culturally specific about scale? And what does scale mean in a world where an intuitive, visual understanding is often undermined or superseded by other senses, or by hyper-reality? Structured thematically in three parts, this book addresses various issues of scale. The book includes an introduction which sets the scene in terms of current architectural discourse and also contains a visual essay in each section. It is of interest to undergraduate and postgraduate students, academics and practitioners in architecture and architectural theory as well as to students in a range of other disciplines including art history and theory, geography, anthropology and landscape architecture.

The creation of metropolitan areas is influenced by a wide array of factors, both practical and ecological. They can also be influenced by immateral characteristics of a given area. The Handbook of Research on Perception-Driven Approaches to Urban Assessment and Design is a scholarly resource that assesses metropolitan development and its relation to the ecological and sustainability issues these areas face. Featuring coverage on a wide range of topics such as user-centered urban planning, perception of urban landscapes, and thermal comfort in urban contexts, this publication is geared toward professionals, practitioners, researchers, and students seeking relevant research on the effective planning of metropolitan areas and their relation to the ecological and sustainability issues that face such areas.

Perception Architecture Urban
The augmentation of urban spaces with technology, commonly referred to as Media Architecture, has found increasing interest in the scientific community within the last few years. At the same time architects began to use digital media as a new material apart from concrete, glass or wood to create buildings and urban structures. Simultaneously, Human-Computer Interaction (HCI) researchers began to exploit the interaction opportunities between users and buildings and to bridge the gaps between interface, information medium and architecture. As an example, they extended architectural structures with interactive, light-emitting elements on their outer shell, thereby transforming the surfaces of these structures into giant public screens. At the same time the wide distribution of mobile devices and the coverage of mobile internet allow manifold interaction opportunities between open data and citizens, thereby enabling the internet of things in the public domain. However, the appropriate distribution of information to all citizens is still cumbersome and a mutual dialogue not always successful (i.e. who gets what data and when?). In this book we therefore provide a deeper investigation of Using Information and Media as Construction Material with media architecture as an input and output medium.

Definitions of space are as diverse as the disciplines in which it plays a fundamental role; from science and philosophy to art and architecture, each field's perception of space is often simplified or reduced. This consequently denies access to 'new spaces', whose definitions and perspectives, strategies and impacts on human perception are rarely considered in any cohesive manner. This is where the Aedes Network Campus Berlin (ANCB) programme 'No Space Without Traits' came in: particularly through artistic approaches, it aimed to open doors into spatial worlds that until now have remained closed. The symposium 'PERCEPTION in Architecture. HERE and NOW' was part of this programme and invited critical and comprehensive contributions by academics, artists, architects, designers and curators. These presentations are brought together in this volume to reflect upon new spatial concepts and thus access 'new spaces' of perception in architecture. The symposium stimulated a discourse focused on spaces as a collective entity, notions of spatial truth, the multiplicity of experience, and Wahrnehmungsapparate, as well as physical, visual, acoustic and virtual manifestations of space in relation to social, cultural, historical and political forces.

The themes of this "Arctitecture Annual" focuses on how the materials, design, construction and running of a building can affect the environment.

As the outcome of the seventh international congress, the papers in this volume cover a wide range of topics related to the main theme of the conference, titled "Current Debates in Social Sciences", and basically focuses Sustainability in Architecture, Urban Design and Environmental Studies. In this context, the articles in the book draw attention to the different aspects and scales about design and planning processes including architecture, urban design and environment studies. We believe that these studies would contribute to the development of debates in social sciences and encourage interdisciplinary approaches.

Urban conditions are crucial to our experience of modernity, and, as reflected by art, literature and popular culture, have influenced contemporary ideas of what urban life is about. The Urban Lifeworld contributes to our understanding of the cultural role of cities by offering new insight into the analysis of urban experience. Two exceptional cities, New York and Copenhagen, are the focus of this exploration of cultural representations of urban life, which investigates the contrasts between perceptions and formation of the urban lifeworld. Integrating sociological, aesthetic and anthropological approaches to urban questions, this collection of essays presents a new vision of the cityscape which will enrich both academic debate and public life.

Descrierea CIP a Bibliotecii Naționale a României EURAU 2016 - In between scales - European Symposium on Research in Architecture and Urban Design : abstracts : Bucharest, September 28-30th, 2016 / ed.: conf. dr. arch. Andra Panait - București : Editura Universitar?, 1on Mincu, 2016 ISBN 978-608-638-140-6 I. European Symposium on Research in Architecture and Urban Design - EURAU 2016 (2016); Bucharest II. Panait, Andra (ed.) 721063) Graphic design: Andra Panait We acknowledge the help in preparing this volume to the following peoples: Beatrice-Gabriela JÖGER, Daniel COM?A, Marina MIH?IL?, Mihaela ZAMFIR, Oana DIACONESCU, Anda SFINTE?, Daniel ARME?NCIU, C?y?lin CARAGEA, Delia PRISÈCARU, ?tefan MIH?ILESCU, Anca P?IȘ?RIN. EURAU2016 conference and publications were held under the patronage of ANCSI (Autoritatea Națională pentru Cercetare Științifică) în Inovare). Introduction The eighth edition of the European Symposium on Research in Architecture and Urban Design will be held from the 28th to the 30th of September 2016 in Bucharest. The seminar will take place at the 'Ion Mincu' University of Architecture and Urban Planning from Bucharest in collaboration with the institutions that organized the previous editions: École Nationale Supérieure d'Architecture de Marseille, on doctoral research (2004); Ecole Nationale Supérieure d'Architecture et Paysage de Lille, on large scale (2005); Association des Instituts Supérieurs Brussels-Liège-Mons (IESA), on cultural heritage (2006); Escuela Superior de Arquitectura de la Universidad Politécnica de Madrid, under the theme cultural landscape (2008); Facoltà di Architettura dell'Università degli Studi di Napoli Federico II, under the theme venustas (2010); Faculdade de Arquitectura da Universidade do Porto, on public space and contemporary city (2012); Faculty of Architecture of the Istanbul Technical University, on composite cities (2014). The project EURAU is constituted within a network of schools and researchers in Architecture and Urbanism, meeting every two years to share the status of their investigation. In the long-term, it is intended to lead to the creation of a physical meeting and deposit space with all the research undertaken and ongoing in Europe to facilitate the sharing of resources and deepening of knowledge in these scientific areas. The main concern of the EURAU is to establish itself as a place of debate and discussion of thematic disciplines of Architecture, City and Town Planning. The theme of EURAU 2016 is "In Between Scales."
