An examination of how the dead were memorialised in late medieval French literature.

Women Classical Scholars: Unsealing the Fountain from the Renaissance to Jacqueline de Romilly is the first written history of the pioneering women born between the Renaissance and 1913 who played significant roles in the history of classical scholarship. Facing seemingly insurmountable obstacles from patriarchal social systems and educational institutions - from learning Latin and Greek as a marginalized minority, to being excluded from institutional support, denigrated for being lightweight or over-ambitious, and working in the shadows of husbands, fathers, and brothers - they nevertheless continued to teach, edit, translate, analyse, and elucidate the texts left to us by the ancient Greeks and Romans. In this volume twenty essays by international leaders in the field chronicle the lives of women from around the globe who have shaped the discipline over more than five hundred years. Arranged in broadly chronological order from the Italian, Iberian, and Portuguese Renaissance through to the Stalinist Soviet Union and occupied France, they synthesize illuminating overviews of the evolution of classical scholarship with incisive case-studies into often overlooked key figures: some, like Madame Anne Dacier, were already famous in their home countries but have been neglected in previous, male-centred accounts, while others have been almost completely lost to the mainstream cultural memory. This book identifies and celebrates them - their frustrations, achievements, and lasting records; in so doing it provides the classical scholars of today, regardless of gender, with the female intellectual ancestors they did not know they had.

The Routledge Handbook of Multilingualism provides a comprehensive survey of the field of multilingualism for a global readership, and an overview of the research which situates multilingualism in its social, cultural and political context. The handbook includes an introduction and five sections with thirty two chapters by leading international contributors. The introduction charts the changing landscape of social and ethnographic research on multilingualism (theory, methods and research sites) and it foregrounds key contemporary debates. Chapters are structured around sub-headings such as: early developments, key issues related to theory and method, new research directions. This handbook offers an authoritative guide to shifts over time in thinking about multilingualism as well as providing an overview of the range of contemporary themes, debates and research sites. The Routledge Handbook of Multilingualism is the ideal resource for postgraduate students of multilingualism, as well as those studying education and anthropology.

Located at the intersection of sociolinguistics and Hip Hop Studies, this cutting-edge book moves around the world – spanning Africa, Asia, Australia, the Americas and the European Union – to explore Hip Hop cultures, youth identities, the politics of language, and the simultaneous processes of globalization and localization. Focusing closely on language, these scholars of sociolinguistics, linguistic anthropology, cultural studies, and critical pedagogies offer linguistic insights to the growing scholarship on Hip Hop Culture, while reorienting their respective fields by paying closer attention to processes of globalization and localization. The book engages complex processes such as transnationalism, (im)migration, cultural flow, and diaspora in an effort to expand current theoretical approaches to language choice and agency, speech style and stylization, codeswitching and language mixing, crossing and sociolinguistic variation, and language use and globalization. Moving throughout the Global Hip Hop Nation, through scenes as diverse as Hong Kong’s urban center, Germany’s Mannheim inner-city district of Weststadt, the Brazilian favelas, the streets of Lagos and Dar es Salaam, and the hoods of the San Francisco Bay Area, this global intellectual cipa breaks new ground in the ethnographic study of language and popular culture.

The field of verbal aspect has been a focus for the derivation of a multiplicity of theoretical approaches ranging over decades of linguistic research. From the point of view of recent studies, though, there has been relatively little emphasis on the nature of the interaction of aspect with other categories, and the ways in which our knowledge of aspect acts as a primary semantic contributor to the creation of other basic verbal parameters such as tense and modality. This book aims to cross some of the categorial borders, using a collection of studies on the interfaces of English aspect with other grammatical domains. The studies in the book have been assembled in order to answer two central issues surrounding the nature of English aspect: the

possibility of the historical co-existence of a perfective and imperfective grammatical distinction in English, and the derivation of modality as an inference arising out of specific conflicts and combinations of lexical and grammatical aspect. In answering these questions, a data-driven, rather than a theory-driven approach is favoured, and the general principles of Gricean pragmatics and grammaticalisation are applied to a wide range of empirical sources to propose alternative explanations to some long-established problems of English historical linguistics and semantics.
