Identify how scientists used the scientific method to test ...  
The scientific method is a systematic way of learning about the world around us and answering questions. The key difference between the scientific method and other ways of acquiring knowledge are forming a hypothesis and then testing it with an experiment.

6 Steps of the Scientific Method - ThoughtCo  
By Murray Shukyn, Achim K. Krull. It's a good idea to approach the GED Science test questions using the scientific method. The scientific method is a step-by-step approach to answering science questions and solving problems. It ensures the credibility and reproducibility of experimental evidence. Now you'd think that for a scientific method to be scientific, all scientists would agree on the steps involved.
