Technical Information CENTUM VP - Yokogawa
All the CENTUM series field control stations (FCSs), both software and hardware, have been developed by Yokogawa. CENTUM VP can be flexibly designed ranging from small- to large-scale. The CENTUM VP controller is capable of handling a massive amount of field data at comfortable speeds that fully satisfies the needs in the field digital era.

CENTUM VP DCS | Yokogawa America
Yokogawa has developed a servo module and a high-speed protection module as turbomachinery I/O modules and has developed the turbomachinery control system on the CENTUM VP platform. A range of new high-speed I/O modules will be added using this platform for deployment to the high-speed control field (electric control and servo systems) which is difficult to accomplish by conventional DCS.
