The Departure is the first of The Owner novels, though Neal 's story collection The Engineer (and its later revised version, The Engineer Reconditioned) tell three stories of the Owner Universe. Whilst the short stories tell of events much later, The Departure sets up the basics in the origin of the stories.

The Departure makes Orwell ' s 1984 look like a utopia in comparison. The future Neal imagines is far more disturbing due to the Committee ' s absolute disregard for human life. They possess both the technology for constant surveillance as well as the weaponry to extinguish human lives by the millions, something the government in 1984 never had.

inducers. Soon the Committee will have the power to edit human minds, but not yet, twelve billion human being need to die before Earth can be stabilized, but by turning large portions of Earth into concentration camps this is achievable, especially when the Argus satellite laser network comes fully online . . . This is the world Alan Saul wakes to in his crate on the conveyor to the Calais incinerator. How he got there he does not know, but he does remember the pain and the face of his interrogator. Informed by Janus, through the hardware implanted in his skull, about the world as it is now Saul is determined to destroy it, just as soon as he has found out who he was, and killed his interrogator . . .

From the author of the #1 bestselling *The Atlantis Gene* comes a new novel in which the world 's past and future rests in the hands of five unwitting strangers in this definitive edition of A. G. Riddle's time-traveling, mind-bending speculative thriller. En route to London from New York, Flight 305 suddenly loses power and crash-lands in the English countryside, plunging a group of strangers into a mysterious adventure that will have repercussions for all of humankind. Struggling to stay alive, the survivors soon realize that the world they 've crashed in is very different from the one they left. But where are they? Why are they here? And how will they get back home? Five passengers seem to hold clues about what 's really going on: writer Harper Lane, venture capitalist Nick Stone, German genetic researcher Sabrina Schröder, computer scientist Yul Tan, and Grayson Shaw, the son of a billionaire philanthropist. As more facts about the crash emerge, it becomes clear that some in this group know more than they 're letting on—answers that will lead Harper and Nick to uncover a far-reaching conspiracy involving their own lives. As they begin to piece together

the truth, they discover they have the power to change the future and the past—to save our world . . . or end it. A wildly inventive and propulsive adventure full of hairpin twists, *Departure* is a thrilling tale that weaves together power, ambition, fate, memory, and love, from a bold and visionary talent.

In a world devoid of hope, is revenge the only way out? The Argus Space Station looks down on a nightmarish Earth. And from here, the Committee enforces its despotic rule. It governs a corrupt world, where the poor are starving - and are policed by mechanized overseers wielding identity-reader guns. There are also too many people and too few resources, so the Committee has decided twelve billion people must die. So they prepare to unleash the full power of their Station's weaponry to make this happen. Alan Saul wakes to this world, confined in a crate bound for a Calais incinerator. He doesn't know why he's there; he only remembers pain and his tormentor's face. And he has company: Janus, a rogue intelligence, who is inhabiting forbidden hardware in his skull. As Janus shows his host a damaged Earth, Saul resolves to discover who he was - and kill his interrogator. Next he will take on the Committee and topple their debased regime. *The Departure* is the first fast-paced book in the Owner trilogy by acclaimed science fiction author Neal Asher. A gripping new novel from one of the best-known names in survivalist fiction. Former Marine-turned-author, G. Michael Hopf grabs readers from page one with his breathtaking blend of action, adventure, and political intrigue. The End—the first book in Hopf's New World series—has sold more than 50,000 copies, and word of mouth is quickly building on the series as a whole. In the fourth book, The Line of Departure, the United States is on the brink of total anarchy in the wake of a super-EMP attack. Gordon Van Zandt and his family have managed to beat the odds so far, but can they survive once war erupts?

The complete Green on Green Trilogy of novels is a complex saga of the Viet Nam war era, from the POV of a drafted infantry soldier, Private Michael Landers, very much against the war. By subtle revelations, it melds in with a mythological saga of a tribe of Montagnard people in the Vietnamese Mountains who have never heard of Americans or even

Vietnamese...on purpose. A boy and an old man with wizardly powers have been drafted into a war between their gods. In *Departure*, Landers is due to be shipped out from the Oakland Army Departure Depot, where thousands of soldiers per week are sent to Viet Nam. Only he shows up on LSD, stating that the war is against all American principles; that he won't go. This becomes a 2-month stand-off between him and the military bureaucracy. Begins with Landers surfing and partying with old friends in San Diego's offbeat Ocean Beach. Soon moves to the San Francisco Bay Area, where, when off the military bases, he wanders the streets of San Francisco with a pair of Viet Nam infantry vets, to delve into this extreme version of "Drugs, sex and rock and roll" versus "the Establishment." He uncovers shady government provocateurs leading the U.C. Berkeley anti-war demonstrations. Closely based on personal experience.

Awaken one...awaken them all. Insomniac Piper Laurel focuses on the simple things, the feel-good things. She likes her coffee black, her wine cheap, and her men gone by morning. But when her last living relative dies, she must confront the feel-bad things. She's the last Laurel, she's almost thirty, and she's completely alone. When she returns to her sleepy seaside hometown, her ex is still as yummy as ever, and a familiar-seeming stranger is also there to tug at her heartstrings. But a love triangle isn't the only thing waiting for her. The immortal Anik has spent centuries plotting to claim the last Laurel--and a lot of innocent souls in the bargain. To survive Anik and the Realm Wars, Piper must forget her version of reality and awaken to her destiny as a Seekin, Guardian of Souls. With two men vying for her heart and hellhounds on her heels, Piper must decide who she trusts and who she loves while

embracing her destiny with her eyes wide open.

Humanity is on the ropes, and after years of fighting a two-front war with losing odds, so is North American Defense Corps officer Andrew Grayson. He dreams of dropping out of the service one day, alongside his pilot girlfriend, but as warfare consumes entire planets and conditions on Earth deteriorate, he wonders if there will be anywhere left for them to go.

Aspiring actress Amanda Clark and photographer Michelle Osinski are two women burned by love and not looking to test the fire again. And even if they were, it certainly wouldn't be with each other. Amanda has never been attracted to a butch woman before, and Michelle personifies the term butch. Having just landed a role on a hot new TV show, she's determined to focus on her career and doesn't need any complications in her life. After a turbulent breakup with her starlet ex, Michelle swore she would never get involved with an actress again. Another high-maintenance woman is the last thing she wants, and her first encounter with Amanda certainly makes her appear the type. But after a date that is not a date and some meddling from Amanda's grandmother, they both begin to wonder if it's not time for a departure from their usual dating scripts.

It was a quest for vengeance; now it's full-blown rebellion Earth's Zero Asset citizens no longer face extermination from orbit. Thanks to Alan Saul, the Committee's network of control is a smoking ruin. Its robotic enforcers also lie dormant. But power abhors a vacuum, and the Committee's Serene Galahad seizes command. On Mars, Var Delex is fighting to save

the Antares Base. She must also crush the first signs of its own rebellion, while the Argus Space Station speeds towards the red planet. Var knows that whoever trashed Earth is still aboard. And aboard Argus Station, Alan Saul's mind has expanded into its computer network. There, he learns of the Humanoid Unit Development and its ghastly experiments; the possibility of eternal life; and of a madman who may hold the keys to interstellar flight. But Earth's agents are close, and the killing will soon begin. Zero Point is the second book in Neal Asher's high-octane Owner trilogy.
