But life in the ocean is in trouble. The ocean is becoming hotter, more polluted, and, in places, empty of life. The right amount of warming is good for us, but too much warming is causing shifts that are not good for life in the ocean. Global warming, pollution, and overfishing are creating a New Ocean, in which life is changing drastically.

Global warming, pollution, and
overfishing are creating a New Ocean, in
which life is changing drastically. This
book tells the stories of the probable fates
of six sea dwellers: jellyfish, orcas, sea
turtles, tuna, corals, and blue-green algae.
What becomes of them may help you
