"Science is about knowing, engineering is about doing." -Henry Petroski. The two quotations given above (both taken from our Top 10 Engineering Quotes) succinctly sum up the difference between science and engineering. They reinforce the idea that science is a tool of engineering, but science and engineering each have their own distinct goals.

Science, technology, engineering, and mathematics - Wikipedia
Engineering is the study of the existing body of scientific knowledge to make its use to create new designs and structures. Thus, it is an application of all the body of knowledge that science has produced thus far. This includes totally new designs, as well as learning from past mistakes and creating faster, lighter, more efficient products.
