language. Using data from English, German, and Russian, they develop a systematic analysis of spoken English and highlight properties that hold across languages. The authors argue that the differences in syntax and the construction of discourse between spontaneous speech and written language bear on various areas of linguistic theory, apart from having obvious implications for syntactic analysis. In particular, they bear on typology, Chomskyan theories of first language acquisition, and the perennial problem of language in education. In current typological practice written and spontaneous spoken texts are often compared; the authors show convincingly that typological research should compare like with like. The consequences for Chomskyan, and indeed all, theories of first language acquisition flow from the central fact that children acquire spoken language but learn written language.

Grammar Choices is a different kind of grammar book: It is written for graduate students, including MBA, master's, and doctoral candidates, as well as postdoctoral researchers and faculty. Additionally, it describes the language of advanced academic writing with more than 300 real examples from successful graduate students and from published texts, including corpora. Each of the eight units in Grammar Choices contains: an overview of the grammar topic; a preview test that allows students to assess their control of the target grammar and teachers to diagnose areas of difficulty; an authentic example of graduate-student writing showing the unit grammar in use; clear descriptions of essential grammar structures using the framework of functional grammar, cutting-edge research in applied linguistics, and corpus studies; vocabulary relevant to the grammar point is introduced—for example, common verbs in the passive voice, summary nouns used with this/these, and irregular plural nouns;

Tropes are not only rhetorical means, which are used as a creative and / or persuasive linguistic means in poetry and public speech. They are also a cognitive tool which helps people to understand the world and to express their world. As they are the basis on which our worldview and even our everyday speech is founded, the question must be posed as to whether utterances containing tropes can be said to be true. This has been an epistemological problem since Nietzsche expressed his doubts about the possibility that figurative language could give access to truth. However, since then research has paid little attention to this question. 18 papers by linguists, philosophers, psychologists and literary scholars have been collected in this volume. Their 21 authors use various approaches or paradigms in order to define metaphor, metonymy, synecdoche, irony, euphemism,

antonomasia and hyperbole and find an answer to the crucial epistemological questions, namely whether and to what extent utterances containing tropes can be said to be true or false.
